A very poignant story. Couldn't put the book down. Descriptions of the geological features and flora of Belize in particular, along with descriptions of the hippie era just made one melt into the past and draw you into the beauty of the surroundings. A very captivating, yet traumatizing experience through the jungles of Belize. Feeling the intense pain of the main character could make anyone terrified of being defenseless in an isolated land. This remarkable woman amazed me at her courage to endure the pain she suffered but more importantly her sacrifices and strength to escape it. It will make any woman aware of the pain one could endure when physically and mentally abused by someone and how terrifying it can be to escape it when the abuser is a threat to one's life in a remote surrounding. The main character displays her incredible and courageous journey to seek safety. This story will really make you aware of how one abused woman overcame her pain in a dangerous situation.
