This review is from: BELIZE SURVIVOR: Darker Side of Paradise (Paperback)

This book is riveting, from the first page to the last. I guarantee you will not be able to put it down. It will make you laugh, cry, scream, shout and explode with emotions. The author's accurate descriptions of both the people and the landscape of Belize are so completely real you will feel as though you are there. Having experienced Belize myself, I honestly didn't feel there was anyway you could do that without being there in person. That was before I read the book. So detailed were her descriptive narratives that I actually stumbled upon her son, who is still in the country, on my recent visit. I will leave the details of that to all of you treasure seekers out there to find out for yourselves. Trust me...it will be worth the adventure. A must read for those who think they should pick up and move to Belize...this is the real truth. Belize is a beautiful country but it's not for the faint of heart or spirit. The only thing better than the book was the thought of a movie that I hope will be filmed in Belize's beautiful, lush, countryside. Bravo Nancy!!! This is an excellent book and a must have for any left over hippie generation or those of us who should have been in the hippie generation.
